£65

Includes up to 1 hr labour.  
Parts will be charged in addition.

### Installation from...

£1100

Pricing subject to free site survey and quotation

**How much does Power Flushing cost?** Your central heating system can get blocked over time – power flushing cleans your pipes and radiators. This can lead to quieter boilers, fewer cold spots in radiators and lower fuel bills.

Power flushing starts from £50 per radiator, including the materials for the water treatment. The more radiators you have, the less you pay per radiator, please see next page for pricing structure.

We accept payment via Credit and Debit Cards. You can pay with your Visa, Mastercard and Maestro Cards. Payments can be taken safely and securely over the phone with our Customer Service Team. Please contact us if you wish to pay via cash, cheque or BACS.

 *Competitive and clear Pricing*

 *Free site survey for new installations and boiler replacements*

 *Check the website for our current offers and loyalty schemes*

## Power Flushing pricing structure:

£200 for 4 radiators (£50 per radiator)  
£250 for 5 radiators (£50 per radiator)  
£295 for 6 radiators (£49.17 per radiator)  
£340 for 7 radiators (£48.57 per radiator)  
£385 for 8 radiators (£48.13 per radiator)  
£425 for 9 radiators (£47.22 per radiator)  
£465 for 10 radiators (£46.5 per radiator)  
£505 for 11 radiators (£45.91 per radiator)  
£545 for 12 radiators (£45.42 per radiator)  
£45 per radiator for more than 12 radiators

## Radiator Replacement, installation or re-location

Some older heating systems were badly designed, poorly spaced or inadequate for heating the requirements. Add radiators to improve your heating system or replace your old ones to save money on fuel bills.

Or you may need to move a radiator to suit your new room layout – there's nothing worse than not being able to have a bed against the wall because there's a radiator in the way.

We fit all types of radiators from £120

**Gas Appliance Installation** from £60 including fires, hobs, cookers etc.

**Upgrades to your heating system** from £80

- Replace your standard radiator valves with thermostatic valves to improve energy efficiency.
- Install room thermostats to manage the temperature in your home better.
- Upgrade your heating controls to an advanced programmer for greater flexibility.
- Fit a MagnaClean on your heating system to prevent the build up of sludge and debris in your pipes.

We accept payment via Credit and Debit Cards. You can pay with your Visa, Mastercard and Maestro Cards. Payments can be taken safely and securely over the phone with our Customer Service Team. Please contact us if you wish to pay via cash, cheque or BACS.
